

The Federal Communications Commission

Dear The Federal Communications Commission,

Knock it off, damn it! I live on an Indian reservation, the Navajo Reservation and to have a direct line to my residence would mean that I would have to pay \$50,000 to have normal phone service...\$50,000!!!! I now have to use a cell phone and phone cards just to be able to communicate with my family and a Son who is a STUDENT and you had better know that that costs MONEY!!!! Stop this goddamned NONSENSE!!!!

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

Sincerely,

patrick giago
